

HERE'S WHAT FELLOW GOOD SAM MEMBERS HAD TO SAY ABOUT OUR BATTERYMINDER®...

Back in the Summer of 2000, the new product editorial staff of Highways, the official magazine of the Good Sam Club, sent product evaluation requests to Good Sam members who had been given BatteryMINDER®s for evaluation. Virtually all respondents rated the units good to excellent for the following criteria:

Convenience

Ease of installation

Ease of use

Instructions complete and easy to understand

Quality of construction

Usefulness

Uniqueness

This is what they had to say:

Raymond W. Green, Bristol, RI, GS #C48772503

"Unit can be left on without over-charging batteries which is not the case with converter-mounted chargers. Also keeps batteries from becoming sulphated which is very common in RV type vehicles. . . I was very impressed with the product."

Robert B. Cecil, Christiansburg, VA, GS #46902268

"The BatterMINDER® is great for connecting to your RV batteries, while the RV is in storage/winter. You can leave it connected, without worry of over-charging your battery."

Eugene R. Burke, Michigan, GS #043141464

"It is very easy to hook up. . . the either-or type of hookup to batteries is an excellent idea."

Allen Crowe, Spotswood, NJ, GS #043335991

"With a 5 year warranty and excellent instructions I don't foresee any problems"

Carl L. Ellert, Clearwater, FL, GS #36633675

"I really like the compactness of the BatteryMINDER®. . . for a few cents a month will over the years pay for itself in battery replacement costs."

Debra Phoeria, Whitehall, NY, GS #043269075

"Keeping the battery charged is much better and reliable. Saves wear on battery by eliminating the need to jump start."

Chris & Sharon Lang, Bryceville, FL, GS #45574001

"Just plug it in, leave it, when you're ready, just go!"
