Installation Instructions:

Before starting installation, disconnect the aircraft battery.

Connect the positive lead (fused with 5/16" ring terminal) to the aircraft's battery solenoid where the primary wire from battery attaches. DO NOT CONNECT DIRECTLY TO BATTERY TERMINALS.

Connect the negative or ground lead with the #10 ring terminal to airframe ground.

Secure cable assembly. Test to confirm proper continuity and polarity, then reconnect aircraft battery. Connect to BatteryMINDer aviation-specific charger and confirm proper operation.
